

Mohamed Sayid Lotfy

Network & System Administrator | IT Infrastructure Specialist

Cairo, Egypt | +20 150 333 3155 | mohamed-sayid@outlook.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Network & System Administrator with 5+ years of IT experience managing enterprise and medical IT infrastructure across Egypt. Specializing in Cisco networking (CCNA certified — ID: CSCO15040282, CCNP Enterprise Core), Windows Server administration, virtualization (Hyper-V, VMware), and cybersecurity hardening. Currently holding dual roles at Viion and Main Sharia Association Hospital. Proven track record: improved network performance by 75%, reduced security incidents by 90%, and achieved 99%+ uptime in critical medical environments.

CORE TECHNICAL COMPETENCIES

Networking: LAN, WAN, VLAN, OSPF, EIGRP, BGP, Subnetting, VPN (IPsec/SSL), QoS, STP/RSTP

Network Devices: Cisco Routers & Switches (IOS), Fortinet Firewall, pfSense, Cisco Meraki APs

System Admin: Windows Server 2016/2019/2022, Active Directory, DHCP, DNS, Group Policy, WSUS, SCCM

Virtualization: VMware ESXi/vCenter, Hyper-V, Proxmox, P2V Migration, HA Clustering

Security: Firewall ACL, Endpoint Protection (Sophos/Kaspersky), BitLocker, Zero-Trust, Wazuh SIEM, IDS/IPS

Cloud & Hybrid: Microsoft Azure, Azure AD, Microsoft 365, Exchange Migration, SharePoint, Hybrid VPN

Backup & DR: Veeam Backup & Replication, 3-2-1 Strategy, Bare-Metal Recovery, RTO < 2hrs

Automation: Python (Netmiko, Paramiko), PowerShell, Ansible, Shell Scripting, Git/GitHub, Docker

Monitoring: PRTG, Zabbix, Grafana, Elastic Stack, Syslog

Medical IT: HIS Integration, PACS, Medical Device Isolation, Healthcare Compliance

PROFESSIONAL EXPERIENCE

Network & System Administrator — [Viion](#) | July 2024 – Present

- Redesigned entire network topology using Layer 3 switches, OSPF routing, VLAN segmentation, and perimeter firewalls — increasing throughput by 75% and reducing weekly downtime to near zero.
- Migrated 6 legacy physical servers (Windows Server 2008 R2) to a Hyper-V HA cluster running Windows Server 2019, cutting hardware costs by 60% and provisioning time from days to minutes.
- Deployed comprehensive GPO baseline across all domain-joined machines: USB lockdown, BitLocker, WSUS — raising patch compliance from 40% to 98%.
- Configured site-to-site VPNs linking on-premises infrastructure to Microsoft Azure; managed hybrid M365 environment including Exchange, Teams, and SharePoint.
- Automated configuration backups for 200+ Cisco devices using Python (Netmiko/Paramiko) and Ansible, reducing manual administration time by 80%.
- Deployed Veeam Backup & Replication with immutable air-gapped repositories; achieved RTO under 4 hours across 5 physical sites.
- Set up Wazuh SIEM integrated with Elastic Stack for real-time monitoring, syslog collection, and Suricata IDS alerting.

System Administrator — [Main Sharia Association Hospital](#) | September 2024 – Present

- Deployed Windows Server 2019 with Active Directory for 100+ user organization; designed full OU structure, GPO, DNS, and DHCP with zero downtime during rollout.
- Segmented medical devices (HIS, PACS, lab equipment) on isolated VLANs with strict Fortinet/Sophos firewall ACLs, reducing unauthorized access incidents by 90%.
- Established Hyper-V virtualization for critical services and a disaster recovery plan with off-site replication — achieving 99%+ system uptime.
- Executed zero-downtime Cisco network overhaul: L3 core switches, OSPF routing, RSTP — eliminating broadcast storms and reducing network downtime by 99%.
- Implemented data protection framework covering backup schedules, access controls, and incident response — achieving zero data loss since deployment.

IT Specialist — Xceed | April 2023 – August 2024

- Delivered remote and on-site technical support for hardware, software, and network issues using structured diagnostic methodologies.
- Resolved escalated tickets with high accuracy and speed, consistently improving first-call resolution rates.

KEY IT PROJECTS

- Active Directory Full Deployment: Designed and deployed complete AD environment (100+ users) covering domain controllers, OU structure, GPO, DNS, DHCP — zero downtime.
- M365 Cloud Migration: Led on-premise Exchange to Microsoft 365 migration including mailbox transfers, Teams setup, SharePoint configuration — zero email data loss.
- Fortigate Firewall & VPN: Deployed UTM firewall with IPsec VPN tunnels; implemented WPA3 Enterprise with RADIUS authentication and full guest VLAN isolation.
- Enterprise Wireless (Cisco Meraki): Designed and deployed controller-based Wi-Fi across multi-floor facility with seamless roaming and 802.1X authentication.
- Network Automation Scripts: Python (Netmiko/Paramiko) scripts for automated config backups and bulk changes across 200+ Cisco devices.
- ITIL Helpdesk Rollout: Implemented IT service desk with defined SLAs, support tiers, and monthly analytics reporting to management.

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) — ID: CSC015040282 — Valid: November 2025 – November 2028
- CCNAV7: Introduction to Networks — Cisco Networking Academy, November 2024
- CCNAV7: Switching, Routing & Wireless Essentials — Cisco Networking Academy, November 2024
- CCNAV7: Enterprise Networking, Security & Automation — Cisco Networking Academy, November 2024
- CCNP Enterprise: Core Networking (OSPF, EIGRP, eBGP, QoS, VPN, Wireless, Automation) — Cisco Networking Academy, December 2024
- MCSA 2016 Course (60 Hours) — SCAL Academy, January 2025 — SN: 1010

EDUCATION

Bachelor of Science — Management Information Systems

Al-Abbasiya Institute for Computer and Commercial Sciences | September 2019 – July 2023

Focus: Information Systems, Database Management, Business Analysis, IT Infrastructure

KEY ACHIEVEMENTS

- Improved network performance by 75% through infrastructure optimization and OSPF routing redesign at Viion.
- Reduced security incidents by 90% via multi-layer firewall policies, endpoint protection, and VLAN segmentation.
- Achieved 99%+ uptime for critical medical systems (HIS, PACS) at Main Sharia Association Hospital.
- Cut virtual server provisioning time by 80% through centralized Hyper-V templates and Ansible automation.
- Reduced IT infrastructure costs by approximately 40% through server consolidation and cloud-based licensing.
- Obtained CCNA and CCNP Enterprise Core certifications while managing two concurrent full-time IT roles.

HOMELAB & SELF-DEVELOPMENT

Virtualization: VMware ESXi 8.0 cluster, Proxmox — 14 active VMs for AD, networking, and Linux services

Network Simulation: EVE-NG / GNS3 for OSPF, EIGRP, BGP, and STP topology testing (CCNP-level labs)

Security Lab: Wazuh SIEM + Elastic Stack, pfSense IDS/IPS, OpenVPN, Suricata alerts

Automation: Ansible playbooks, Docker/Portainer, Pi-hole, Nginx Proxy Manager, Grafana dashboards

Storage: TrueNAS ZFS server for VM backups, ISO images, and SMB/NFS shares

LANGUAGES & ADDITIONAL INFORMATION

Arabic: Native | English: Advanced | Military Service: Permanently Exempt
