Mohamed Sayid Lotfy

Infrastructure & Security Engineer

Cairo, Egypt | +20 150 333 3155 | mohamed-sayid@outlook.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Infrastructure & Security Engineer with 5 years of hands-on experience across enterprise, healthcare and financial-sector IT in Egypt. Strong in Cisco networking (CCNA), Windows Server and Active Directory, Hyper-V/VMware virtualization, Fortinet and pfSense firewalls, and backup & disaster recovery. Combines full-time infrastructure roles with remote support and consulting for clients in Egypt and abroad. Currently leads IT operations across 5 sites with a 5-person team. Targeting Systems Administrator, Network/Security Engineer and IT Manager roles.

CORE TECHNICAL SKILLS

- **Networking:** LAN/WAN, VLAN, OSPF, EIGRP, BGP, STP/RSTP, QoS, IPsec/SSL VPN, subnetting
- **Network & security devices:** Cisco routers and switches (IOS), Fortinet, pfSense, Cisco Meraki, Sophos
- **Systems:** Windows Server 2016/2019/2022, Active Directory, DNS, DHCP, Group Policy, WSUS, SCCM, Linux administration
- **Virtualization:** Hyper-V (HA clustering), VMware ESXi/vCenter, Proxmox, P2V migration
- **Security:** firewall ACLs, endpoint protection (Sophos/Kaspersky), BitLocker, Wazuh SIEM, IDS/IPS, network segmentation
- **Backup & DR:** Veeam Backup & Replication, 3-2-1 strategy, bare-metal recovery
- **Cloud & hybrid:** Microsoft 365, Exchange migration, Microsoft Entra ID (Azure AD), Azure virtual machines; AWS (learning)
- **Automation:** Python (Netmiko, Paramiko), PowerShell, Ansible, Bash, Git, Docker
- **Monitoring:** PRTG, Zabbix, Grafana, Elastic Stack, Syslog
- **Healthcare IT:** HIS and PACS environments, medical device network isolation

PROFESSIONAL EXPERIENCE

IT Operations Manager (Infrastructure & Security Engineer) — Viion *Feb 2025 – Present (Full-Time)*

- Redesigned the network with Layer 3 switching, OSPF, VLAN segmentation and perimeter firewalls, bringing weekly downtime to near zero.
- Migrated 6 legacy Windows Server 2008 R2 servers to a Hyper-V HA cluster on Windows Server 2019.
- Deployed a GPO baseline (USB lockdown, BitLocker, WSUS) that raised patch compliance from 40% to 98%.
- Automated configuration backups for 200+ Cisco devices with Python (Netmiko/Paramiko) and Ansible.
- Deployed Veeam Backup & Replication with immutable repositories across 5 sites, with a recovery time objective under 2 hours.
- Grew from owning infrastructure and security at a single site to leading IT operations across all branches, managing a 5-person team (scheduling, delegation, escalation).
- Led vendor evaluation and negotiation (Fortinet vs. Sophos, Google Workspace vs. Microsoft 365) and wrote an IT governance matrix covering access permissions for 16+ roles.
- Wrote IT downtime and disaster recovery playbooks with escalation matrices, plus automated daily infrastructure checklists in Google Apps Script.

Network & System Administrator — Main Sharia Association Hospital *Dec 2023 – Feb 2025*

- Deployed Windows Server 2019 and Active Directory for 100+ users: OU structure, GPO, DNS and DHCP, with no downtime during rollout.
- Isolated medical systems (HIS, PACS, lab equipment) on dedicated VLANs behind Fortinet/Sophos firewall ACLs, cutting unauthorized access incidents by 90%.
- Built Hyper-V virtualization for critical services with off-site replication, reaching 99%+ uptime.
- Rebuilt the network core with L3 switches, OSPF and RSTP, eliminating broadcast storms.
- Set up backup schedules, access controls and an incident response process.

IT Specialist — Xceed *Apr 2023 – Oct 2023*

- Provided remote and on-site support for hardware, software and network issues, resolving escalated tickets.
- Introduced an ITIL-based helpdesk workflow with defined SLAs, support tiers and monthly reports to management.

IT Consulting & Remote Support — Freelance / Part-Time

- **Remote technical support (Art Topia, Canada, plus 4 other companies):** handle tickets from the company mailbox and ticketing system, and connect to users through remote-access tools to diagnose and fix hardware, software and network problems.
- **Remote IT support, company in Argentina:** provided remote technical support to a company based in Argentina.
- **WE (Telecom Egypt), server refresh project:** freelance project to update the servers, awarded on the strength of earlier work with the company.
- **Healthcare IT consulting:** on-demand infrastructure and network consulting for hospitals in Egypt.
- **Aesthetic center, Dokki (Cairo):** designed and set up the full network.
- **Bank Alexandria, Cairo branch (project):** member of the team that built the branch IT infrastructure; responsible for the switches and for coordinating cabling and connectivity with the field technicians.
- **Clinic mail server:** migrated the clinic's mail server to a new platform.
- **Websites:** built websites for several clients, including a clothing factory and a bookstore.

CERTIFICATIONS & TRAINING

- Cisco Certified Network Associate (CCNA), ID CSCO15040282, certified Nov 26, 2025, valid through Nov 26, 2028
- DevOps Diploma (120 hours), SCAL Academy, Sep 2026
- CCNP Security: SCOR course (40 hours), SCAL Academy, Aug 2026 (exam not taken)
- Ansible RH294 course (40 hours), SCAL Academy, Jun 2026
- Introduction to Programming & AI (40 hours), SCAL Academy, Apr 2026
- Linux Administration I & II (64 hours), SCAL Academy, Feb 2026
- Bash Scripting (20 hours), SCAL Academy, May 2025
- MCSA 2016 course (60 hours), SCAL Academy, Jan 2025
- CCNP Enterprise Core (ENCOR) course, Cisco Networking Academy via SCAL Academy, Dec 2024 (exam not taken)
- CCNAv7 courses (Introduction to Networks; Switching, Routing & Wireless Essentials; Enterprise Networking, Security & Automation), Cisco Networking Academy via SCAL Academy, Nov 2024

EDUCATION

Bachelor of Science, Management Information Systems — Al-Abbasiya Institute for Computer and Commercial Sciences, Sep 2019 – Jul 2023

HOMELAB

- VMware ESXi 8.0 cluster and Proxmox running 14 VMs (Active Directory, networking, Linux services)
- EVE-NG / GNS3 labs for OSPF, EIGRP, BGP and STP at CCNP level
- Security lab: Wazuh SIEM with Elastic Stack, pfSense IDS/IPS, Suricata, OpenVPN
- Ansible playbooks, Docker/Portainer, Grafana dashboards, TrueNAS ZFS storage for VM backups

LANGUAGES

Arabic (native), English (advanced). Military service: permanently exempt.
